Methodology

We make comparison of all possibilities for ESIF investments to VET providers, primary schools and other relevant partners – first part Other Operational Programs vs OP Human Resources and second part directly OP Human Resources vs Other Operational Programs as most appropriate ESIF Fund /ESF/ for our purpose - beneficiaries, target groups and expected results.

Still we have possibility prepare project for ERASMUS + - EU Program, Europe for Citizen - EU Program, projects for state budget grant system as “regional contribution” for less developed districts or special state grant scheme (for example for clusters, capital investments to primary schools ...) or regional self-government grant schemes, city grant schemes and other financial possibilities.

We prepare the database of relevant open calls for 4th December table for next 6 months and database for planned relevant calls – **Table 3**.

Also “Andrea and Helena” proposed to clustering all VET Schools at PSK to three clusters according priority and type of investments (maybe size of investment)- For pilot 5 VET Schools - Table – Integrated Investment Plan as first background documents for investment package development.

Andrea made the test to one VET School in Kežmarok as example of Integrated Investment Plan as first background documents for VET pilot school investment package development /I will translate/.
